

## „Doctor Sus and alien Bob”

Yesterday I was at my job. I am an alien's doctor. Everyday I am happy, because I can help them. Yesterday to my doctor's room came an alien Bob. He was all pink. Normally he is green with yellow spots. First I told him "Bob, sit on this chair and tell me what's the matter?" He said "I don't know doctor Sus. I was with my friends in forest. When I came back to home I was pink!". "Ok. I'll have a look" I examined him, but it was normal. I thought " Uhm... I know! X-ray!" I told Bob "Come on Bob. I must use an X-ray." When I used x-ray I saw: two Bob's hearts, lungs, one little stomach. "Uhm... Doctor Sus? I feel dizzy and I have stomach ache. " Bob, did you eat something?". "Yes, blueberry, but they were green". " Oh no! You ate poisonous berries! And now you have a small stomach. One of your hearts does not beat. Your lungs are green! Normally you have blue lungs! I must put some water into your stomach". Bob's fingers fell off on the floor. Two of three his eyes didn't wink. Bob's muscles stopped. His bones disappeared. I ran to doctor Bones. He helped me, because he had thousands of patients who ate poisonous berries. We helped Bob together. But that day I was very, very frightened.
